Vasanth

Java Backend Developer | 4 Years of Experience

Bangalore, India | +91-8500149037 | vasanthmodepalli@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Java Backend Developer with 4 years of experience engineering and scaling high-volume asynchronous backend services using Core Java, Spring Boot, REST APIs, Microservices, and Apache Kafka. Proven expertise in building resilient event-driven pipelines, optimizing complex SQL queries (25% performance boost), and performing production root-cause analysis under high-concurrency peak traffic loads.

TECHNICAL SKILLS

Languages	Java 8/17, SQL, PL/SQL, Python
Backend Frameworks	Spring Boot, Spring MVC, REST APIs, Microservices, Hibernate, Spring Data JPA
Databases & Queues	Apache Kafka, Redis, Oracle, MySQL, PostgreSQL
Tools & Platforms	Dynatrace, Confluent Control Center, Docker, Git, Maven, Postman, Linux
Core Competencies	Event-Driven Architecture, API Integration, SQL Optimization, RCA, System Debugging

PROFESSIONAL EXPERIENCE

Infosys Ltd. Jan 2024 – Present

Senior Systems Engineer - Java Backend Engineering *Bangalore, India*

- Engineered asynchronous microservices and event-driven workflows handling millions of peak-season transaction payloads using Core Java, Spring Boot, and Apache Kafka.
- Built custom Kafka bulk connectors and automated retry mechanisms to clear message pendency, completely eliminating downstream processing backlogs during peak traffic surges.
- Monitored service health, API network latencies, and Kafka consumer lag using Dynatrace and Confluent Control Center to diagnose and resolve production bottlenecks under heavy load.
- Optimized complex SQL queries, stored procedures, and execution plans, improving backend data retrieval performance by 25% during peak tax filing seasons through index tuning.
- Diagnosed and resolved critical production feed failures, API contract mismatches, and data anomalies by tracing service logs, thread dumps, and database execution paths.
- Collaborated across engineering teams to enforce schema consistency, API contract validations, and resilient REST/async communication across distributed microservices.

Infosys Ltd. Nov 2022 – Jan 2024

Systems Engineer - Java Backend Developer *Bangalore, India*

- Developed core backend services in Java for high-volume income tax workflows, ensuring strict adherence to business validation logic and service uptime.
- Executed API contract validations and integration testing across microservices, preventing regressions prior to production deployments.
- Built SQL diagnostic utilities to trace data inconsistencies across distributed databases and delivered permanent query and code-level fixes.

KEY PROJECT

Event-Driven Notification Engine *Java 17, Spring Boot, Apache Kafka, Redis, Docker*

- Architected a high-throughput notification service using Java 17, Spring Boot, and Apache Kafka to process decoupled event payloads asynchronously.
- Implemented exponential backoff retry strategies and Dead-Letter Queue (DLQ) error handling to guarantee delivery integrity during downstream service outages.
- Integrated Redis caching for dispatch metadata and rate limiting, significantly reducing database read strain under peak traffic spikes.
- Containerized the full application stack using Docker to ensure seamless local development and reproducible production environments.

EDUCATION

Sasi Institute of Technology and Engineering 2018 – 2022

Bachelor of Technology (B.Tech) - Mechanical Engineering *Andhra Pradesh, India*

CERTIFICATIONS & ACHIEVEMENTS

- **Infosys Certified Spring Boot Developer** - Professional credential in microservices and REST APIs.
- **Infosys Certified Java SE8 Developer** - Professional credential in core Java and OOP principles.
