VASANTH KUMAR M

Java Developer | 4 Years Experience | Bangalore, India | Serving Notice Period | +91-8500149037
vasanthmodepalli@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Java Developer with 4 years of experience building Java/Spring integration microservices and Kafka event pipelines for India's Income Tax e-filing platform, processing 3–4 million records per day at peak. Experienced with Java 17, Spring Boot, Hibernate, REST APIs, Kafka, Redis, Oracle, and PostgreSQL. Hands-on with reconciliation, replay of failed records, and production root-cause analysis.

TECHNICAL SKILLS

Languages: Java 8/17, SQL, PL/SQL, Python
Core Java & CS: Collections, Streams & Lambdas, Multithreading, OOP, Design Patterns, Data Structures & Algorithms
Backend: Spring Boot 3, Spring MVC, Spring Data JPA, Hibernate, Spring Security (JWT), REST APIs, Microservices, FastAPI
Frontend: React, TypeScript
Messaging & Caching: Apache Kafka, Kafka Connect, consumer groups, lag monitoring, DLQ, retry/backoff, Redis, caching, rate limiting
Databases: Oracle, PostgreSQL, MySQL, query optimization, index tuning
Tools & Testing: JUnit 5, Mockito, Docker, Docker Compose, Git, Maven, Postman, Linux, Dynatrace, Confluent Control Center, Agile

PROFESSIONAL EXPERIENCE

Infosys Ltd. — *Senior Systems Engineer, Bangalore* Jan 2024 – Present

- Built and maintain Java/Spring integration microservices (Spring MVC, Hibernate, Oracle, PostgreSQL) that stream tax-filing data to external government systems through Kafka Connect → Kafka → REST; handled partner API authentication, per-record delivery auditing, and retries.
- Contributed to 2 production batch pipelines, working on Kafka Connect source connectors, consumer services, and multi-stage business-rule processing for end-to-end record workflows.
- Onboarded new tax forms to downstream feeds and reconciled delivery outcomes (success, business error, timeout); traced gaps to configuration or data-insertion issues and re-pushed missed records through a replay path.
- Built a Python/Oracle SQL reconciliation utility that generated JSON payloads and re-triggered 4,000–5,000 missed ITR records in under 5 minutes; later exposed it as a FastAPI service for the wider team.
- Automated a data-processing workflow, reducing execution time from about 90 minutes to under 10 minutes and eliminating recurring manual errors.

Infosys Ltd. — *Systems Engineer, Bangalore* Nov 2022 – Jan 2024

- Maintained critical income-tax portal modules during high-volume filing periods; investigated transaction failures across Java services, database records, and external payloads, delivering permanent fixes.
- Performed REST API testing, payload validation, and database verification using Postman, SQL, and log analysis.

PROJECTS

Event-Driven Notification Engine — *Java 17, Spring Boot 3, Kafka, PostgreSQL, Redis, Spring Security, Docker*

- Built an asynchronous notification service with JWT-secured REST endpoints that persist requests to PostgreSQL and publish Kafka events, decoupling request ingestion from delivery.
- Implemented exponential-backoff retries (3 attempts at 2s/4s/8s), a Dead-Letter Queue topic, and a DLQ consumer for exhausted messages.
- Designed a Redis-backed token bucket rate limiter (10 requests/minute per user) and Idempotency-Key deduplication with a 24-hour TTL.
- Added JUnit 5 and Mockito tests for retry, rate-limiting, and idempotency paths; containerized the stack with Docker Compose.

URL Shortener Service — *Java 17, Spring Boot 3, MySQL, Redis, Docker*

- Built a RESTful URL shortener generating collision-safe aliases with Base62 encoding over a sequential ID space; added Redis cache-aside for frequently accessed URLs.
- Implemented click analytics, DTO validation, and centralized exception handling; containerized the application with Docker.

EDUCATION

B.Tech, Mechanical Engineering — Sasi Institute of Technology and Engineering, AP, India 2018 – 2022

CERTIFICATIONS & ACHIEVEMENTS

Solved 150+ DSA problems on LeetCode • Infosys Certified Spring Boot Developer • Infosys Certified Java SE8 Developer
